

How to Write a Research Report

Suhendro Y.I

Introduction

Purpose of a research report

Importance in academic and professional settings

Overview of what will be covered

Structure of a Research Report

Title Page

Abstract

Introduction

Methodology

Results

Discussion

Conclusion

References

Appendices
(if any)

Title and Abstract

Title: Clear, concise, and informative

Abstract: Summary of purpose, method, results, and conclusions (150–250 words)

Introduction

Background information

Research problem and objectives

Significance of the study

Hypothesis or research question

Methodology

Research design
(qualitative/quantitative/mixed)

Participants or data sources

Instruments and procedures

Data collection and analysis
techniques

Results

Present

Present findings logically

Use

Use tables, charts, or graphs

Avoid

Avoid interpretation in this section

Discussion

Interpret

Interpret the results

Link
back

Link back to research question/hypothesis

Compare

Compare with previous studies

Explain

Explain implications

Conclusion

01

Restate the
main findings

02

Reflect on
limitations

03

Suggest future
research
directions

References and Appendices

Use a consistent citation style
(APA, MLA, etc.)

Include only sources cited

Appendices: Additional
material (questionnaires,
data tables, etc.)

Writing Tips

Be clear and concise

Use formal academic
language

Avoid plagiarism—always
cite sources

Proofread and revise

Final Tips and Q&A

Plan ahead and start early

Use outlines before writing

Ask for feedback

Any Questions?

Differences Among Bachelor Report, Master Thesis, and PhD Thesis

A Comparative Overview

1. Purpose & Scope

- Bachelor Report: Demonstrates understanding of basic concepts.
- Master Thesis: Explores a specific topic with moderate depth.
- PhD Thesis: Contributes original knowledge to the field.

2. Research Depth

- Bachelor Report: Limited research, mainly literature review.
- Master Thesis: Intermediate research with some data analysis.
- PhD Thesis: In-depth, novel research with comprehensive analysis.

3. Length & Duration

Bachelor Report: ~30–50 pages; 3–6 months.

Master Thesis: ~60–100 pages; 6–12 months.

PhD Thesis: 150+ pages; 3–5 years.

4. Supervision & Independence

Bachelor: Closely supervised, structured guidance.

Master: Some independence, periodic supervision.

PhD: High level of independence with advisory guidance.

5. Contribution & Originality

BACHELOR:
DEMONSTRATES
ACADEMIC SKILLS.

MASTER: SHOWS
ANALYTICAL AND
RESEARCH ABILITY.

PHD: PRODUCES ORIGINAL
SCHOLARLY
CONTRIBUTION.

6. Defense & Publication

Bachelor: May not
require defense.

Master: Usually
includes defense.

PhD: Requires
defense and
publications in
journals.
